

MAXI-DUSTER

- ✓ Trickle Duster
- ✓ Continuous Application
- ✓ Non-Pressurised Hose

Designed for 25NB air supply it will continuously discharge dust 100 metres or more via a 50NB stonedust hose.

Unit has no moving parts and no electrics. It is intrinsically safe and constructed aluminium free to meet mining regulations.

SIZE - 1200mm (H) x 600mm (dia.)

WEIGHT - 29kg

The hopper has in excess of 15 bags capacity with a lid secured by chain to keep the contents dry.

The unit has a 25NB claw coupler for connection of the air supply hose and the air throughput can be controlled by regulating the air supply ball valve.

Fluidising points in the hopper can be adjusted by regulating the fluidising air control valve.

Dust induction volume can be adjusted by rotating the stonedust volume control cone in the bottom of the hopper.

A 50NB brass male camlock is fitted for connection of the FRAS stonedust delivery hose which can be supplied with the unit if required.
